This course emphasizes on how multinationals clinical trials are performed, planning for conduction, clinical study planning and project management concepts for site initiating, conduction, and monitoring. This training will provide the technical skills and practicum needed to gain expertise. The course curriculum is designed to give an edge to obtain job opportunities in the clinical research field with Pharmaceuticals, Biotech, Medical Device, Clinical Research Organizations (CROs) and with Research Clinics.

Project Management Concepts: This course includes theoretical concepts from the Project Management Institute, PMBOK® as introductory project management course for the clinical research professional. Whether you are looking to become a clinical research project manager, are already in an entry-level project manager role, or a project manager without formal project training, this hands-on program will provide you with project management skills as well as the necessary tools and processes required to successfully manage projects in clinical research settings.

The typical career pathway of CRA begins from entry level position working as Clinical Research Assistant.

The promotion to mid level positions comes with progress and experience while the opportunities remain open for Clinical Research Associate and Documentation Specialist.

TYPICAL CAREER PATH OF Clinical Research Associate

What is the Difference Between Basic CRA and Advanced CRA ?	
CRA	Advanced
<p>Basic and core topics and exercises</p> <p>Certain educational background is strongly recommended to enter the industry</p> <p>Designed for non experienced individuals to enter into field</p> <p>In depth knowledge of roles and responsibilities of CRA + theoretical aspect with projects which help to understand industry requirements</p>	<p>Advanced topics and exercises</p> <p>Prior training or relevant experience is required</p> <p>Designed for experienced professionals to add new skills set</p> <p>Exposure to diverse CRA exercises, real time documentation + advanced learning supported by practical case scenario tasks and follow up process</p>
